DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Arakawa (USPN 4,636,658).

With respect to claims 1-11 and 16-18, Arakawa discloses, in Fig. 5, a circuit comprising: “a first transistor (C_1)”; and “a second transistor (C_2)”, all connected and operating similarly as recited by Applicant. The reference to Arakawa expressly states that there is a predetermined ratio between the capacitances C_1 and C_2 , which is established due to the difference between the “gate electrode areas” (e.g., see Col. 5, lines 50-54).

With respect to claims 12-15, 19 and 20 are, clearly the above circuit to Arakawa will provide the recited method. In addition to the above discussion, the reference to Arakawa expressly provides an example of the ratio being 1 (i.e., the “gate electrodes areas are equal”). Reference is made to Col. 4, lines 7-22.
